

SJG Cable Dispenser

The unique, solid steel, Cable Dispenser.

The SJG Cable Dispenser is a must for all types of cable installers:

- ▲ Electrical
- ▲ Security
- ▲ CCTV
- ▲ Telecoms
- ▲ Satellite

Made in England

- ▲ The SJG Cable Dispenser is manufactured in England by SJG from solid steel.
- ▲ Taking a tiny amount of space in the car or van and easy to store & carry, it is always on hand when installing cables
- ▲ Amazingly, it is just as happy dispensing very large drums [such as DW10 or 40pr] as it is dispensing small [eg jumper wire]. Two convenient fixing holes in the base cater for static applications.
- ▲ Originally designed for dispensing Dropwire 10, it actually dispenses two drums at the same time
- ▲ The dispenser will handle several drums at the same time and, when joined together, will dispense multiple drums
- ▲ The product has been extensively proved in the field with glowing testimonials from all types of installers
- ▲ Straight forward and easy to use: saves time, effort and cash
- ▲ Helps avoid cable tangles and knots
